Trends in the UCITS Market

Net Sales by Investment Type

UCITS posted net inflows of EUR 30 billion during the second quarter of 2009. Net inflows have now been positive for two quarters in a row, following eighteen months of net withdrawals from UCITS.

This development reflected net inflows of EUR 60 billion into equity, bond and balanced funds in the second quarter, compared to net outflows of EUR 18 billion in the first quarter. The stock market rally and less stressed financial market conditions have ignited greater investor confidence since mid March, leading to gradual portfolio asset allocation shifts towards more stocks and fixed-income securities-oriented investments. Confirming this evolution in investor sentiment, net inflows into money market funds turned significantly negative in the second quarter.

Trends in the UCITS Market

Net Sales by Investment Type

Looking at the trend in monthly net sales¹, the charts below show that equity, bond and balanced funds have attracted positive inflows continuously since April. Money market funds, on the other hand, recorded sharp outflows in June, following two months of lower activity. These figures confirm that UCITS benefited from the return of optimism about stock markets, global growth recovery and financial market conditions.

¹ Differences in totals between quarterly and monthly net sales reflect differences in the universe of reporting countries.

Trends in the UCITS Market

Net Sales by Country of Domiciliation

The majority of countries recorded positive net sales in the first quarter of 2009. Net inflows were particularly strong in the second quarter in Luxembourg (EUR 10 billion), the United Kingdom (EUR 9.1 billion) and Switzerland (EUR 8.7 billion). Luxembourg-domiciled equity and bond funds were particularly successful in attracting net new money (EUR 10.1 billion and 12.5 billion, respectively), following 7 quarters of negative outflows. Simultaneously, for the first time since the last quarter of 2006, Luxembourg-domiciled money market funds recorded negative outflows. Elsewhere in Europe, Italy-domiciled equity funds recorded positive net inflows for the first time in any quarter since 2000. And in relative terms, net inflows into equity funds were particularly strong in the Nordic countries, ranging from 4 percent and 8 percent of net assets at end March 2009, compared to a European average of 2 percent.

During the first half of 2009, the strongest level of net inflows was observed in France (EUR 34 billion), thanks to strong inflows into money market funds in the first quarter of 2009 (EUR 41 billion). The United Kingdom held the second largest share in total net sales in January-June (16 billion), followed by Switzerland (EUR 9 billion), Luxembourg (EUR 5 billion).

Trends in the UCITS Market

Net Assets by Investment Type

Total net assets of UCITS increased by 7.3 percent in the second quarter to reach EUR 4,783 billion at end June 2009. Equity funds recorded the sharpest increase (EUR 204 billion or 19 percent), mostly reflecting stock market gains. Bond and balanced funds also saw their assets increased appreciably. On the other hand, money market funds saw their assets decline by 4 percent in the second quarter of 2009. This development mirrored net outflows of EUR 25 billion as well as the entry in vigor of a new classification of money market funds in Spain, which led to the reclassification of some funds into bond funds. Rising stock prices and net inflows pushed the share of equity funds in UCITS assets upwards from 28 percent at end March to 31 percent at end June.

Since the end of 2008, total assets of UCITS rose by 5.3 percent, or EUR 241 billion. New money invested in UCITS represented 2 percent of UCITS assets at end 2009. Equity funds enjoyed the strongest asset increase. The sharp reduction in the net assets held in funds of funds reflected the reclassification of German-domiciled funds of funds into the other types of funds.

Trends in the UCITS Market

Net Assets by Country of Domiciliation

Looking at the development in the major fund markets in the second quarter of 2009, the United Kingdom and Germany enjoyed double-digit asset growth: 22 percent and 11 percent, respectively. UK-domiciled UCITS benefited from strong inflows as well as from a 9 percent appreciation of the Pound. Ireland and Luxembourg also enjoyed stronger-than-average asset growth. Elsewhere, the asset increase was particularly strong in the Nordic countries, in particular in Sweden and Norway – two countries where the share of equity funds in UCITS assets remained high at end March 2009 (57 percent and 43 percent, respectively). All central European countries except Slovakia also enjoyed above-European-average asset growth, reflecting asset price increases and an appreciation of the exchange rate of the Czech Republic, Hungary and Poland.

Fifteen countries recorded positive asset increase during the first half of 2009. The increase was higher than 10 percent in Finland, Liechtenstein, Norway, Romania, Sweden, Switzerland, Turkey and the United Kingdom.

Trends in the Non-UCITS Market

Net Sales and Assets by Investment Type

Total assets in the non-UCITS market slightly increased 4.2 percent in the second quarter of 2009 to EUR 1,590 billion. Almost 65 percent of the increase was triggered by the rise in the assets of special funds reserved for institutional investors, which in turn reflected asset appreciation. Indeed, despite strong net inflows into Luxembourg and Austria-domiciled special funds, total net inflows fell from EUR 9.3 billion in the first quarter to EUR 1.3 billion in the quarter due to large withdrawals from a Danish pension fund and outflows from Germany special funds.

Since end 2008, total asset of non-UCITS grew by 2.9 percent.

Trends in the European Investment Fund Industry

Net Assets by Country of Domiciliation

The combined assets of the investment fund market in Europe, i.e. the market for UCITS and non-UCITS, increased by 6.5 percent in the second quarter to reach EUR 6,373 billion at end June 2009.

With EUR 4,783 billion invested in UCITS, this segment of the business accounted for 75 percent of the fund market at end June 2009.

Since end 2008, the European investment fund industry saw its assets rise by 4.7 percent, or EUR 285 billion.
